

Please do not change Indiana's Telephone Privacy law. It has been such a relief. I was receiving so many calls at home in the evening that it made it impossible to get our evening work done-homework with the children, baths, supper, clean up. We rec'd more business solicitation calls then personal calls. Now, when I get a call, I know it is important so I answer the phone. We were at a point we did not answer the phone yet we were afraid we would miss an important call from family or friends, or an emergency call. When our children were out with friends we would run to answer every call on to find it was a business solicitation. It has made a tremendous difference in our quality time at home and I ask you keep the law intact without changes. I have email and mail that business can use. The phone is something I pay for and don't want marketers using my phone time to peddle thier buisness. I have received calls at 9 pm! Please leave the Indiana's Telephone Privacy law alone!!!
